DETAILED ACTION

Allowable Subject Matter

1. Claims 2-9,34-41,52-63 are allowable over the prior art of record.

2. The following is a statement of reasons for the indication of allowable subject matter:

As per independent claims 2,34, the claim limitations pertaining to restricting the first coding mode using less bits then a second coding mode, wherein the coding modes are specifically a first vector quantizer to jointly code an adaptive codebook and fixed codebook gain, is not explicitly taught by the prior art of record.

With respect to the prior art of record, Manjunath et al (6691084) teaches a fixed rate speech compression system for processing a frame of a speech signal (col. 1, lines 5-10 → performing multiple coding modes (fig. 12, and col. 21 lines 15-65)); and Aoyagi et al (5974375) teaches a 2 dimensional codebooks (Aoyagi et al (5974375), col. 8 lines 14-16). However, none of the representative pieces of art explicitly teach the claim limitations of independent claims 2 and 34 as noted above. Furthermore, it would not have been obvious to one of ordinary skill in the art at the time the invention was made to modify the teachings of the prior art of record to obtain the recited limitations noted above.
